

# DAO Proposal — Geek Protocol

## Summary

This proposal requests ecosystem support for Geek Protocol, a Proof-of-Learning protocol that onboards users through skill-based participation rather than speculation.

## Motivation

Kaspa lacks user-facing public goods that reward contribution over capital and enable long-term engagement.

## Deliverables

Testnet MVP, wallet-gated Quiz-to-Earn gameplay, transparent rewards, public documentation.

## Ecosystem Value

New onboarding vector, educational utility, reusable learning infrastructure, DAO alignment.

## Use of Funds

Core development, infrastructure, security testing, community onboarding.

## Success Metrics

Active wallets, sessions completed, rewards distributed, governance participation.

## Closing

Geek Protocol aligns with Kaspa's principles of performance, fairness, and decentralization.
